

Our Fleet

Our fleet consists of 197 qualified drivers and over 220 pieces of leased equipment. We have been recognized by the American Moving & Storage Association (AMSA) 11 times in the past 15 years for Fleet Safety. Two of our drivers have received AMSA's Lifetime Achievement award and one driver AMSA's Super Van Operator award.

The reason for those honors is that American Red Ball's safety standards exceed DOT requirements and we carefully screen, qualify and monitor our drivers for regulatory compliance. We also recognize that our drivers are American Red Ball's ambassadors and have the most direct contact with our customers. Therefore, our drivers are rated on their level of cooperation and customer satisfaction through our Circle of Excellence program.

CONTRACTOR/AGENT PERMANENT FLEET

The direct lease contractors and equipment leased through our agents and designated as permanent feet are under the direct continuous control of our traffic department and have the same priority of dispatch.

AGENT REGIONAL FLEET

Agents may choose to designate regional equipment as permanent and our traffic department will plan loads for these drivers. Most regional equipment, however, is under the control and direction of the agent. When requested by the agent, our traffic department will plan return loads.
